At the time that Gen. Duarte was proclaimed At the time that Gen. Duarte was proclaimed President at La Vega and on this side of the Island, Gen Santa Aña was on the frentiers with his army. While there, he received a commission from Portau-Prince, after which he commenced his march on St. Domingo—his army increasing on the route. Report says he apocared before the city with an army of 6,000 men, in a tolerable state of discipline, and was by them made President. He is in favor of French protection—so report says. Whether such protection would benefit the country, is hard to tell. On the principle that a powerful friend is a benefit, the protection of the French may possibly benefit these people, provided their commerce with other bations, and their own internal Government, are not interfered with.

are not interfered with.

As I before informed you, Gen. Duarte is a white man, about 30 years old; Gen. St. Aña is Spanish white, about 55 years old. The last named has deall his fortune to this revolution; two of the voted all his fortune to this revolution; two of the man-of-war schooners are his private property. The existing difficulties may be amicably arranged; but I believe myself there will be some fighting, it the two Presidents can bring their followers up to it.—
The people do n't like that sort of work.

Mississippi .- We observed in the Globe, a day or two ago, an extract of a letter (copied from a Southern paper) from "a distinguished gentleman living in South Mississippi," beginning in the following exulting strain:

The signs are most aurensisus for a grand and triumphant victory in the Full. Every Democrat in this part of the State is more than satisfied with Polk's monimation; we shall certainly give the largest Democratic vote this full. In South Missispin that has been given for years. Hundreds of Whigs, and some of the oldest and most investrate as well as the best in formed and most influential, are going for Polk on The TEX SURENTOS. We are in the midst of a great revolution; a great and overwhelming victory areasts us as certainly as the world stands till November. STEALING VELVET.—Charles Gilbert was arrested for stealing two pieces of cotton velvet from the store of Mesers, Griffin & Co. No. 172 Chatham street, which was found in his possession, and he was committed.

EFFECTING A CONVICT'S ESCAPE.—A fellow named William Burke, who had lately served out his period of imprisonment on Blackwell's Island, was arrested on a charge of effecting the escape from the Penttentiary of a girl named Sa. ab Underhill, who had yet two months to serve, which he did with the assistance of others, carrying her off at night in a boat. He was commuted to prison for trul.

ROBBING A BROKER.—Seven boys were arrested this forenoon, by officers Jorceh Drinker and T. M. Lycon, charged with having stolen \$2.500 from the till of Jazger & Clark, Wall streat brokers, and they were committed for examination.

Septicion of MURDER, &c.—An old man named Christopher C. Davis, was arrested by officers Cockefait and

So far from there being any sufficient ground for the confidence here expressed, we have rea-son to believe, from letters of later date from Mississippi, that the probability is directly the reverse of that above stated. A letter from Hinds County, in Mississippi, now before us, under date of Joly 14, runs as follows: "We hope to carry this State for Mr. Clay. The Texas question is considered dead since the election in Louisiana." [National Intelligencer.

NEWLY DISCOVERED SHOAL ON THE CHINA SEAS. -We learn from Capt. Keene, of ship Henry Pratt, who arrived yesterday from Canton, that he discov-ered a dangerous shoal running North and Souts, about half a mile in length, apparently level with the water's edge, and having a rock or dead tree (many of which we saw floating about) on the North ern end; having had calms, light birs, and variable currents for two days, could not determine the exact position of it. By observation next day, placed it in lat. I 33 South, long. 107 27 East; we lay in sight of the shoal from 9 A. M. iil 4 P. West set of about 11 [Journal Com. miles per hour.

SUSPECTED MURDER AT SEA .- We are informed by Capt. Soule, of brig Frances Louisa, that on the 22d inst. his mate, Abel Moore of Tippsburg, Me. died very suddenly. The cook is suspected of having poisoned him.

The day after the death of the inate, the servant

The day after the death of the mate, the servain girl of the Consul informed Capt. S. that the cook had a loaded pistol, and that he intended to shoot Capt. Soule. The Captain then went to him and asked him for the pistol, but he denied having any. A watch was then seit over him; he was seen to draw a charge from a pistol, and three balls rolled on the floor. He was then seized and scarched, and the floor. The was then seized and scarched, and on the floor. He was then seized and scarched, and on him was found another pistol loaded with three balls. A pocket in his shirt was found full of percussion caps. He was then placed in irons and put below. On the 29th inst, off Capes of Virginia, he was permitted to come on deck, when he watched his opportunity and jumped overboard. The pilot boat Henry Clay, of Baltimore, being alongside at the time, picked him up and put him on board the brig again.

IMPROVED PIN MACHINE.-Messrs. Brown & Elton, Waterbury, Ct. have in operation an improved machine for the manufacture of Pins, which turns out as we are informed by a gentleman recently from that place, two barrels of pins a day. The machine is wonderfully curious—perfect and simple in its operation. The wire is run into the machine om a reel, cut to the requisite length, pointed and chine they fall into the hopper of the Sticking Ma-chine, as it is called, in which, by some diab/erie, they are arranged and stuck upon the papers, and come out perfect, only requiring to be packed to be ready for sale. This latter machine, tended only

come out perfect, only requiring to be packed to be ready for sale. This latter machine, tended only by one girl, will do the work of thirty persons by the old hand process. We have said that two barrels of pins are made a day. A barrel contains 4,000,000 pins, consequently 3,000,000 of pins are manufactured in this little machine each day, sufficient to farnish one pin a day for every female in the United States! There are four other machines in operation in the country, but they probably do not turn out an equal number per day as the Waterbury machine.

WALKER THE ABOLITIONIST.—The United States Steamer Gen. Taylor, Lt. Com. E. Farrand, arrived here last Thursday evening from Key West, brought prisoner the man Jonathan Walker who recently abducted the seven negro slaves belonging to Messrs. Willis and Caldwell, under a commitment from the civil authority and on being taken before the United States District Judge, the Court being in session, was immediately remanded to prison, on failing to give the necessary bail, to await his trial at the next term of the Court. When the prisoner landed on the wharf the crowd was immense, and as he was escorted to the Court House by the Deputy Marshal the crowd thronged the streets and sidewalks, and the Court room was filled to overflowing with a highly excited mass of peculic

a convict in our State Prison, now serving the second
year of his term) was returning from Lowell in the
stage, with her child about seven months old. Near
Felchville she left the stage, to go, as she said,
across the field to the house of an acquaintance.

Not long after, the body of the child was found
naked in the brook with the skull broken. The woman was arrested and the child's clothes found in
her basket.

The Woodstock Mercury states that the woman was examined before a magistrate and discharged; much to the astonishment, it would seem, of the

A CRASH .- The New-Orleans Tropic of the 20th ays: "On Wednesday evening last, a brick building which was being rebuilt and repaired on Villere street, between Canal and Jackson streets, took a notion that the workmen had not done it justice, so by the way of saving the lives of those who were destined to inhabit it, it concluded that it was best to fall to one. The last root consequently kicked to fall at once. The slate roof, consequently, kicked out the front, and a thundering crash was the consequence." Fortunately no lives were lost.

We learn from the Plaquemine Gazette that ohu McWilliams the murderer of W. Hickey, and

John McWilliams the murderer of W. Hickey, and Wm. More, accused of negro stealing, escaped from the jail in that place on Tuesday night last and have not since been heard of.
